True HD Resolution

The LW130W camera features HD resolution images at 720p for clear and detailed HD images.

As Easy To Connect as a Laptop

The demand for HD wireless network security cameras is increasing. Improved image quality with true HD video resolution, wireless portability, and ease of use are just some of the key advantages that are driving the move towards an HD Wi-Fi network solution for video surveillance.

Plug-and-Play Connectivity

With a wireless security solution, there's no need to run video cables. Just provide power and you're ready to send real-time, high resolution HD video to your PC, smartphone or recording device.

Save Money with Wi-Fi Solutions

Wi-Fi network security solutions are now much more affordable than they were in the past, and since they do not require video cabling, costs are reduced by not having to run cable in "hard-to-wire" buildings.

Why does LG make it's own chipset?

Most camera manufacturers use chipsets from third-party companies. LG makes it's own, exclusive chipset. This means that you get a chipset that is designed to work seamlessly with all the other camera components, resulting in superior image resolution.

WHY LG?

A Trusted Brand

LG is one of the world's leading producers of consumer electronics, mobile communications, home appliances and security products. Many countries around the world rely on LG's trusted security products, now available to the US market.

Customer-Driven Design

LG's product design philosophy combines ergonomics with the latest cutting-edge technology to enhance functionality.

Innovative Technology

LG continues to be pioneers of innovation by incorporating advanced technology into their products, including their proprietary XDI-V chipset with 3-line filter and edge enhancement for home security solutions.

What is Auto Tracking?

Auto Tracking automatically captures a dynamic object (like a moving person) and follows its movements. It's a great feature for unmanned surveillances or busy security environments.

ONLY LG's GOT IT

XDI advanced chipset technology.
Crisp detailed images.
Even in low light conditions.

SEE IT ALL ONLINE

What Should you Expect From a Video Surveillance System?

- ▶ Deter Criminals
- ▶ Protect your business – people and assets
- ▶ Alert you to events
- ▶ Provide evidence...if you need it!

At the same time, your security camera system should be easy to install and easy to use. There are three key elements to consider when designing your security plan: your budget, your required coverage, and any possible installation limitations in your desired coverage areas. All of this comes together to answer the one key question: What do I want to accomplish with my video security system?

Learn How a System Benefits You

Core functionality should include an ability to view live or recorded footage and playback video. Smartphone compatibility is important in accessing your system from anywhere. Also consider the system interface, select something easy for you to use, and don't forget to purchase a monitor to view your footage!

Key Questions to Consider

How much video do I want to store? Do I need cameras that can see in the dark? How far is my subject from the camera? Will my needs grow in the near future? Selecting the right camera, DVR with appropriate storage, IP over analog, it doesn't have to be overwhelming – just call us – we are here to help!

Going Wireless

If avoiding cabling is important to you, digital wireless technology has greatly improved over the past few years and should be considered as it delivers high-resolution, interference-free images and you are protected with digitally encrypted video. Great option for quick installation needs!

High Def Through Coax Cabling

HDcctv systems allow you to utilize existing analog CCTV coax cabling as long as the cable distance is sufficient for HDcctv video signals (RG/59/RG6 and RG/11 or fiber optics).

HDcctv video cameras are point-to-point, and you can use existing coax cables to send the video feed directly from the camera to the recording device or DVR without the need for encoders or an existing network.

New! HDcctv DVRs

We have HD-only DVRs and Hybrid models that accept both HD and analog cameras, so you can leverage your existing security investment.

HD DVR HD Cameras Only

NEW! HDcctv 4, 8, and 16 Channel H.264 DVR with DVD Burner

Take advantage of high-resolution HDcctv cameras with this HDcctv DVR

- Realtime Live Display and still image capture
 - Digital zoom, live and playback
 - HDMI/VGA/BNC Monitor Outputs
 - Remote management & configuration
 - Advanced notifications
 - Easy Offload via DVD, network & USB
 - Mobile Access via FREE iPhone & Android app
- Comes with USB Mouse, IR Remote Control, Client Software, Power supply, 3-year warranty (with a Security Cameras Direct-installed hard drive) and 30-day money-back guarantee. Hard drive not included.*

Video-Enhanced Business Intelligence

Seamless Integration of your video and Data Intelligence

DIGIOP ELEMENTS™ is a ground breaking Video-Enhanced Intelligence Platform that provides a single, user-friendly interface to the critical video and data intelligence you rely on.

DIGIOP Elements™ Simple Licensing

- Non-expiring licenses
- No recurring fees
- No hidden fees
- System-based upgrades for future enhancements
- With DIGIOP, you only pay for what you need, and only pay once

DIGIOP Elements™ Features & Benefits

Unified Dashboard

- ▶ Quickly Access Video
- ▶ Customizable interface for every user
- ▶ Multi-monitor support
- ▶ See any system element the way you want
- ▶ View all system components in one spot
- ▶ Close-up, high-resolution images
- ▶ Ensure system up-time

Business Intelligence

- ▶ Bring data from various sources (eg. POS, ATM, access controls, cameras) together in one place
- ▶ Create reports and triggers based on data from all sources

Remote Control

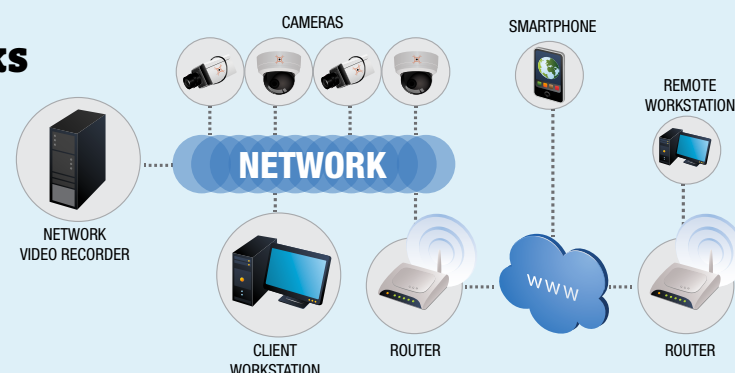

- ▶ Web-based management of your network
- ▶ Control user permissions and settings
- ▶ Get back up and running quickly

Powerful Search & Playback

- ▶ Snapshot video segment viewing
- ▶ Jump to exact dates and times
- ▶ Catch recent action quickly
- ▶ Find exact moments of video
- ▶ Quick export when evidence is required
- ▶ Efficient searching
- ▶ Re-use your typical search parameters
- ▶ Efficient file management

How an IP Network Works

- » DVR on the same network as the cameras
- » IP cameras run over existing network infrastructure
- » Accessible by workstations locally, smartphones, or PCs anywhere in the world via the Internet

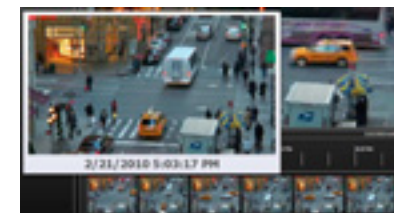

UNLEASH THE POWER
Of Your Video with

**Free 30 day
Trial License**
Call Us Today!

Customizable Interface

- ▶ **Create unlimited windows** – use a 2x2 grid, or layouts that display up to 36 cameras on a single tab.
- ▶ **Combine views of multiple systems** – seamlessly integrate cameras from independent systems on a single display
- ▶ **Set multi-site system tours** – easily program your software to review multi-site displays from a central location
- ▶ **View live and recorded video** – simultaneously display and manage live and recorded video in separate windows

Powerful Searching & Playback

- ▶ **Instant Replay** – a single click, instant rewind of video from the last 1, 2, 5, or 15 minutes.
- ▶ **Thumbnail Search** – quickly navigate your recorded video by viewing thumbnails from the start of motion-based segments.
- ▶ **Quick Export** – single touch save and export tools allow you to easily distribute your recorded video or image clip.
- ▶ **Calendar Search** a powerful search feature that lets you enter the exact date, time and duration that you want to review and use a precise time line slider to examine the time period you've defined
- ▶ **Auto Enlarge** Simply mouse over thumbnails to enlarge the frame of the video to identify the desired part of the video.

Digital Zoom Capabilities

- ▶ **Live & Playback** – easily zoom in on any area of interest in live-view or playback mode.
- ▶ **Analog, IP & Megapixel Cameras** – simply enlarge the area where you want more detail ... results are only limited by your camera's resolution.

**VIDEO ANALYTICS
EXTENDS
THE VALUE**

OF TRADITIONAL
SURVEILLANCE
SYSTEMS BY
ENABLING USERS TO:

- » Count people entering or exiting an area
- » Observe and analyze customer behavior and traffic patterns
- » Evaluate merchandising effectiveness
- » Determine area occupancy

MORE THAN JUST SURVEILLANCE

Combine the power of real-time and recorded video with information from third-party applications and back-office systems, delivering video-enhanced business intelligence for operations, marketing and information technology.

Designed with a scalable, easy-to-manage architecture, these DIGIOP™ systems can meet any challenge – from a four camera installation at a single location to an expansive global network of more than 5,000 locations. Providing a complete line of network and hybrid options, these systems can utilize your existing investments in analog cameras and allow for a seamless migration path to either IP or Megapixel cameras.

All systems feature purpose-built Dell hardware, specifically designed for long life-cycle support, providing the ultimate in long-term system stability and operational consistency. All systems are backed by Dell's award winning next-day service.

DIGIOP™ IP CAMERAS!

High-Performance IP & Megapixel analytics Cameras packed with Advanced Features!

In addition to the latest in IP Network technology, H.264 compression, and 30 fps high resolution video at full D1, these DIGIOP BLACK IP cameras are analytics-capable with scalable features you can unlock to grow as you go.

2.0 Megapixel IP CS-Mount Camera

- Stunning HDTV image quality using progressive scan Aptina Micron CMOS imager, producing 2.0 Megapixel resolution, 1600 × 1200
- Advanced features include Digital Slow Shutter, Extended Dynamic Range of 71dB, built-in Motion Detection, and microSD support
- Supports 12VDC or Power over Ethernet (IEEE 802.3af) for simplified installation

2.0 Megapixel IP CS-Mount Camera BLK-IPS102M **\$429.99**

Indoor IP Mini Dome

- Superior image quality using progressive scan CMOS imager
- Delivers up to 30 FPS high res video @ full D1, 720 × 480
- Includes advanced features such as Digital Slow Shutter, Progressive Scan, and built-in Motion Detection.
- Supports 12 V DC power

Indoor IP Mini Dome Camera BLK-IPD101 **\$249.99**

2.0 Megapixel Indoor/Outdoor Vandal-Resistant Dome

- Supports 12VDC or Power over Ethernet (IEEE 802.3af) for simplified installation
- HD image quality using progressive scan Aptina Micron CMOS imager, producing 2 Megapixel resolution
- H.264 compression technology for optimized image quality and lower bandwidth and storage requirements
- Advanced features include DSS, Extended Dynamic Range of 71dB, built-in Motion Detection and microSD

2.0 Megapixel Indoor/Outdoor Vandal-Resistant Dome BLK-IPD105M **\$579.99**

D1 Digital D/N Indoor Dome

- Superior image quality using 1/3" Omnivision CMOS sensor
- Delivers up to 30 FPS high res video @ full D1, 720 x 480
- Features H.264 compression technology for optimized image quality
- Includes advanced features such as Digital Day/Night Digital Slow Shutter, Progressive Scan, and built-in Motion Detection

D1 Digital D/N Indoor Dome BLK-IPD103 **\$399.99**

Four Channel IP Video Encoder

- Delivers up to 30 FPS high-res de-interlaced video @ full D1, 720 x 480
- Features H.264 compression technology for optimized image quality, and lower bandwidth and storage requirements
- Advanced features include RS-485 PTZ support, Audio & Alarm in/out and USB 2.0
- Comes equipped with 12V DC power supply

Four Channel IP Video Encoder BLK-IPE4101 **\$999.99**

H.264 Network IP Camera

- Superb image quality using 1/3" Sony DS CCD
- Delivers up to 30 FPS high res de-interlaced video @ full D1, 720 × 480
- Advanced features include True Day/Night, Wide Dynamic Range, Audio & Alarm in/out, and microSD support
- Supports 12VDC or Power over Ethernet (IEEE 802.3af) for simplified installation

H.264 Network IP Camera BLK-IPS101 **\$579.99**

Indoor/Outdoor IP Dome

- Stunning image quality using 1/3" Sony DS CCD
- Delivers up to 30 FPS high res de-interlaced video @ full D1, 720 × 480
- Advanced features include True Day/Night, Wide Dynamic Range, Audio & Alarm in/out, and micro SD support
- PoE support (IEEE 802.3af) for simplified installation
- 2.8-10.5mm lens

Indoor/Outdoor IP Dome BLK-IPD102 **\$599.99**

Single Channel IP Video Encoder

- Superior network IP video solution for enhancing traditional analog systems
- Delivers up to 30 FPS high res de-interlaced video @ full D1, 720 × 480
- Features H.264 compression technology for optimized image quality, and lower bandwidth and storage requirements
- Advanced features include RS-485 PTZ support, Audio & Alarm in/out, USB 2.0 and SD card support

Single Channel IP Video Encoder BLK-IPE101 **\$379.99**

VCA ANALYTICS

VCA Analytics are included on all DIGIOP BLACK cameras. Analytics work right of the box and include a self-learning algorithm that automatically adapts to the environment. Start using VCA-PRESENCE right away, and call us to upgrade to VCA-ACCESS or VCA-PRO.

VCA-PRESENCE

General Presence Detection and Camera Tampering Detection

VCA-PRESENCE comes standard with all DIGIOP BLACK cameras and includes user-defined zones with alerts and event smart search.*

VCA-ACCESS

Count People & "Tailgating" Detection

VCA-ACCESS upgrade includes:*

- » VCA-PRESENCE, plus:
- » On-screen counters
- » Counting line
- » Tailgating
- » 40 zones

VCA-PRO

Advanced People-Tracker and Line-Crossing Counting

VCA-PRO upgrade includes:*

- » VCA-PRESENCE and VCA-ACCESS, plus:
- » Class & speed filters
- » Direction & dwell filters
- » Loitering
- » Abandon & object removal
- » Advanced people tracker

* Requires DIGIOP ELEMENTS™ Single Channel IP License + DIGIOP Data Single Channel Activation License for use with DIGIOP ELEMENTS™. Additional licensing may be required for third-party VMS.

New! HD Cameras

The demand for high-resolution video is growing in the video surveillance equipment market and beyond. Nothing compares to the video quality of true high definition (HD) video. HDcctv technology not only delivers incredible resolution and image quality that is far superior to analog CCTV, an HDcctv video system provides a cost-effective video surveillance solution that's easy to integrate, implement and install.

When To Consider HDcctv

The benefits of HDcctv are far-reaching, and almost everyone in every type of industry can benefit from implementing HDcctv technology.

If You Want Better Resolution

If you need higher quality images than analog CCTV, HDcctv will be a big benefit to you when it comes to image quality. HDcctv delivers high-quality, detailed HD resolution to support your business needs. You have the ability to zoom in during live video and playback modes to focus in on area of interest with exceptional clarity and crisp detail.

If You Want To Cut Costs

If you have budget constraints, HDcctv hybrid systems provide a cost-effective solution.

A hybrid HDcctv system allows you to utilize existing analog CCTV equipment, yet provides the ability to utilize HD cameras and features as you need them.

3-year warranty on all BLACK HDcctv cameras and DVRs!

Compare the Quality

HDcctv

Analog

▶LEARN MORE: www.securitycamerasdirect.com/hdcctv-security-solutions

HDcctv & Cabling

HDcctv systems allow you to utilize existing analog CCTV coax cabling as long as the cable distance is sufficient for HDcctv video signals (RG/59/RG6 and RG/11 or fiber optics).

HDcctv video cameras are point-to-point, and you can use existing coax cables to send the video feed directly from the camera to the recording device or DVR without the need for encoders or an existing network.

NEW! 2.1 Megapixel Indoor IR Dome 2-10 mm WDR 12/24

INFRARED ILLUMINATORS

ARE A TOOL TO CONSIDER

1. PERFECT FOR COVERT APPLICATIONS

Infrared illumination is invisible to the human eye, but perfectly visible to most video cameras. So if your goal is to catch a bad guy in the act – and they usually strike in the darkness – then infrared can be an invaluable tool.

2. SAVE ON ENERGY COSTS

Infrared illuminators typically use LEDs to produce illumination. In comparison to incandescent lighting (normal light bulb), LEDs use 80% or less energy while still producing the same level or sometimes greater intensity of light.

3. SAVE EVEN MORE OVER TIME

Infrared illuminators are usually equipped with photocells that turn IR lighting on/off, giving you IR lighting only when necessary. Also, LEDs last between 20,000 and 25,000 hours of constant use, compared to a normal light bulb of 700 to 2000 hours.

4. IMPROVE LIGHT PENETRATION

Infrared light penetrates atmospheric haze better than visible light. Underwater researchers have long been leveraging this unique benefit to help cut through murky waters. Similarly, areas with high humidity and pollution can experience better video quality using infrared.

5. DECREASE LIGHT POLLUTION

In the past, 24/7 security typically meant lots of lights placed around houses, yards, parking lots, and driveways. Today's infrared devices offer you the perfect blend of surveillance without punishing your neighbors with glaring lights.

IF THE IMAGES YOU'RE TRYING TO CAPTURE OCCUR AT NIGHT, YOU NEED IR:

- » Gives you vibrant colors during the daytime high resolution black and white images at night
- » Typically use LED which consumes 80% less energy than incandescent, without compromising image quality
- » Go the distance - up to 492 feet!

NEW! 36X Zoom 700 Lines Outdoor 390' IR PTZ with WDR

Great for mobile applications

- 36X optical zoom & 32X digital zoom
- 700 lines of resolution
- 1/4" Sony Double Scan CCD WDR
- IP66 outdoor rating
- 390' IR range ICR
- RS-485 Pelco D & P Protocol
- 63 Programmable Presets
- Operates on 12 Volts DC 3.3A
- 5.4" (w)

Looking for a small outdoor PTZ security camera that's big on features? The PC409IRPTZ has an incredible 36x optical zoom and 390' IR range in a package that is less than 8.5" x 5.5". Its IP66 weather rating and internal heater/blower allows for use in the harshest environments. 12V DC operation makes using it in a command vehicle easy.

Comes with 1-year warranty and 30-day money-back guarantee.

Record up to 400 Minutes of Audio/Video

- 30 FPS 352 x 240 TVL Recording
- MPEG-4 Video Recording
- Supports 1 Channel of Audio
- Time & Date Stamp
- Runs on 2 AA Batteries (Not Included)
- Small 2.5" W x 3.5" H x 1.1" D
- Offload to SD Card (Not Included)

Mini Portable Security DVR MPE1009 \$189.99

Super Small H.264 DVR

High Resolution Recording

BEST SELLER!

- H.264 Compression @ 30FPS 704 x 480
- Records Schedule, Alarm or Motion Detection
- Built-in OSD & Time/Date Stamp
- 16GB Max SD Card (Not Included)
- IR Remote Control
- Auto Recovery Feature
- 1.8"W x 3.6"L x .70"D
- 12VDC @ 150mA

Compact H.264 1 Channel DVR MPE1023BD \$149.99

High Definition Touch Screen 720P Micro DVR

Records MEGAPIXEL Video!

Compatible with our NEW Megapixel Covert Cameras - MPE1033COV & MPE1033CAM

- Records High-Definition Video & Snapshots
- Records 1280 x 960 (720P) @ 30fps
- HD 2.4" Color LCD Touch Screen
- Built-in Key lock feature for secured recording
- Tamper-proof Watermarked frames with multi layer password Protection
- Manual, Schedule, Loop and Motion Recording
- Offload to USB or SD Card – (up to 32GB - not included)
- Internal Lithium-ion Battery – over 3 hours record time!
- IR Remote Control Included
- Dimensions 3.34" x 2.16" x .66"

Comes with AC power supply/charger, lithium Battery, A/V Cables, USB cable, ear buds, belt ready carrying holster, IR remote, cable controller and a 1 year Warranty.

High Definition Touch Screen 720P Micro DVR MPE1033 \$599.99

New! IP Wireless Bridges

The evolution of 802.11n and MIMO (multiple input multiple output) antenna technology has made wireless for video a workable solution. Today's wireless systems provide will over 100Mbps of total bandwidth which allow for video networks of unlimited scalability. A few years ago, this just wasn't the case. Call us to find out more!

Wireless
that
Works!

Point-to-Point Transmission

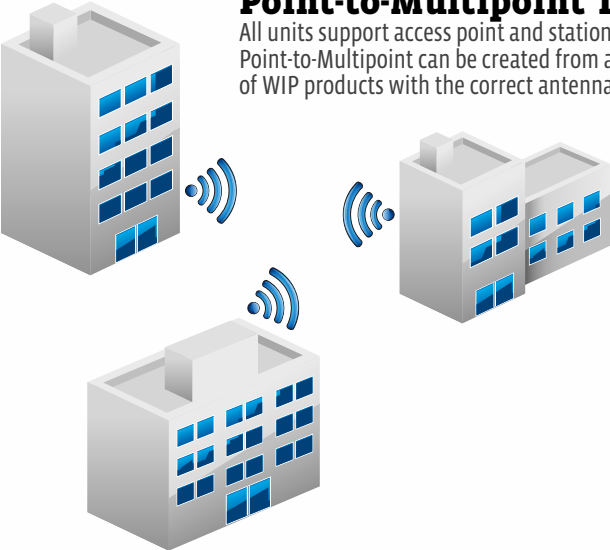

All units support access point and station operating modes. Point-to-point can be created from any combination of WIP products with the correct antenna choices.

GREAT FOR LINKING TWO LOCATIONS

Point-to-Multipoint Transmission

All units support access point and station operating modes. Point-to-Multipoint can be created from any combination of WIP products with the correct antenna choices.

GREAT FOR LINKING MORE THAN TWO LOCATIONS

Security

- Proprietary iPoll™ protocol enables maximum bandwidth with the lowest possible latency.
- Only other WIP products set to iPoll™ will be able to connect to each other wirelessly
- Encryption WPA/WPA2 Personal, WPA/WPA2 Enterprise, WACL, User isolation, UAM (web portal authentication)
- MAC Filtering

Easy Installation

IP wireless bridges include an Integrated Spectrum Analyzer, a spectrum scanning tool, which provides a graphical signal representation and displays maximum, average, and current signal (noise) levels. This makes the installation of devices very easy and allows spectrum pre-scanning to avoid interference problems.

External Link Indicator

WIP units have external LEDs that can be used for:

- Antenna alignment (RSSI level) in a client mode
- Seeing average RSSI level on the base-station side
- Seeing lowest RSSI level on the base-station side

Which Bridge Do I Need?

Outdoor Solutions

TOP FLEXIBILITY

NEW! 5.8 GHz Outdoor MIMO Wireless Access Point

- 5 GHz frequency band
- 802.11 a/n modulation
- 2 x 2 MIMO
- Dual N antenna connectors
- IP65 weather rating

5.8 GHz Outdoor MIMO Wireless Access Point WIP5800N-WR **\$114.99**

POWERFUL CLIENT DEVICE

NEW! 5.8 GHz 18 dBi Outdoor MIMO Wireless Access Point

- 5 GHz frequency band
- 802.11 a/n modulation
- 2 x 2 MIMO
- Integrated dual polarized 18 dBi antenna
- IP65 weather rating

5.8GHz 18dBi Outdoor MIMO Wireless Access Point WIP5818N-WR **\$139.99**

POWERFUL BASE STATION

NEW! 5.8 GHz 90 Degree Outdoor MIMO Wireless Access Point

- 5 GHz frequency band
- 802.11 a/n modulation
- 2 x 2 MIMO
- Integrated dual polarized 20 dBi 90 degree antenna
- IP65 weather rating

5.8 GHz 90 Degree Outdoor MIMO Wireless Access Point WIP5890N-WR **\$199.99**

Indoor Solutions

NEW! 5.8 GHz Indoor MIMO Wireless Access Point

802.11 a/n modulation, 2 x 2 MIMO & Dual 5dBi Omni Antennas

- 5 GHz Frequency Band
- 802.11 a/n modulation
- 2 x 2 MIMO, Dual 3dBi Omni Antennas
- 3.3" (h) x 4.8" (l) 0.78" (h)

This small but robust, high-performance 5 GHz access point is equipped with an extreme output power (up to 29 dBm) 802.11n MIMO radio which allows communicating effectively with older 802.11b/g equipment together with latest standards in wireless devices. The robust software engine features a user-friendly Adobe Flex-based GUI with instant changes, including useful installation tools like site survey, antenna alignment, delayed reboot, spectrum analyzer, ping, and trace route.

Comes with a 1-year warranty and 30-day money-back guarantee.

5.8 GHz Indoor MIMO Wireless Access Point WIP5800N **\$114.99**

IMPORTANT NOTICE ABOUT WIRELESS DEVICES

Many electronic devices use wireless frequencies, including phones, microwaves, and routers. A

dedicated frequency is not always available, which may impact the successful functioning of your wireless solution. Before choosing a wireless system please call us to discuss your environment.
